PORTFOLIO

some of games and features i have been involved in developing at company

WORK EXPERIENCE

IMWI

JULY,2022 – OCTOBER,2022

Unity Developer

- Have about 4 months working at IMWI as a 3D virtual factory simulation software developer through oculus glasses (from July 2022 to October 2022)
- develop a software system to simulate a virtual factory, build delta X robot movement
- Control the movement robot
- Connect Webserver via socket.io
- Access Website Browser in VirXF
- Broadcast video render on Unity to Web Server via network
- Open Vitural Browser in Unity

Projects:

- https://github.com/thanhcongchien/Vitural-Factory

PAPA GROUP

MARCH,2021- SEPTEMBER,2021

Game Developer

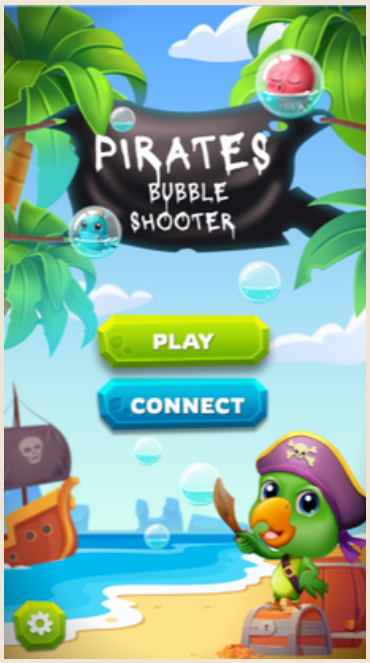

- Have learned and participated in the entire project development process
- Have worked with unity for more than 7 months in Papagroup company and participated in some game projects. Below are some of the projects I participated in while working at the company(2021)Build systems to triage naming requests and manage creative workflow
- I made a casual game like MitMight which is a 2D shooter game like Gunny
- In this project I join as a code client, I work from the UI to the essential functions of the game such as buying and selling items, rankings, and rewards after the game...

Projects:

- https://play.google.com/store/apps/details?id=com.CTMTcoltd.MitMight&hl=en_US&gl=US

PERSONAL PROJECTS

August,2018- Now

Game Developer

- I love game development so during my school time I have developed several products including my graduation project
- Multiplayer Racing-Game-Unity -3D I used Unity and Photon Engine to build this game.
- I built all the features including real-time multiplayer, nitro, maps, and powers-up...

Projects:

- https://github.com/thanhcongchien/Bumpers
- Link Demo: https://www.youtube.com/watch?v=AW0bffwQ2Pw
